Hello.

I'm Timothy Andrew; student at CMR Institute of Technology, studying for a degree in Computer Science Engineering. I'd like to apply for a job at *C42* during your campus placements.

I think I'd be a good fit because:

- I'm interested in UI/UX design, and web app development is a great way to explore that area.
- The culture of a company is immensely important to me – *C42* fits the bill!
- I enjoy the challenge of learning new things and adapting to them quickly.
- I want to work with like-minded people.
- I *love* Ruby!

Thank you!

Best,

Timothy Andrew
